

Compliant Insider Threat Protection for Health Services

Health Services data breaches cost an average of ***\$10.93 M per breach – a 53% increase over the last 3 years.**

With employees causing over one-third of the breaches plaguing the health industry, **businesses like yours need a holistic solution that delivers data security and HIPAA governance while accounting for the human element.**

Did You Know?

A global survey found that **33%** of data breaches in healthcare were due to accidental behaviors, and **25%** were planned leaks by an employee.

Protect Patient Information

Protect PII, PHI, ICD, EMR and other sensitive patient and company data against misuse.

Track Privileged Users

Ensure data is protected against any user, including those with privileged access.

Safeguard Payment Processes

Secure EDI, claim transactions, benefit enrollments and financial records.

Protect PHI on Any Egress Point

Discover and classify PHI and other data in-motion on any egress point.

Secure R&D, Trade Secrets and IP

Protect sensitive data like research, drug patents, and medical studies against loss.

Monitor Any App, Including Custom Built

Track user activity on any app, like HIM systems and specialized healthcare software.

Conduct Thorough Investigations

Leverage screen/audio recordings, alert reports and immutable logs for forensics.

Prevent Medical Fraud and Abuse

Monitor behavior to prevent false claims, inventory loss, kickbacks & drug diversions.

Eliminate Third-Party Risks

Protect against accidental, negligent and malicious actions of insurers, providers, payment processors and other vendors.

Manage HIPAA and Other Regulations

Automatically enforce proper data usage and security in line with HHS, HIPAA and subsequent Omnibus updates.

“Since we installed Teramind, we’ve caught more than one employee trying to steal research. It’s been the best solution for us to detect and stop data breaches of our IP.”

- Enterprise Hospital Customer
