TERAMIND

Teramind OMNI

More insights, less time.

Who doesn't love a good dashboard? When you add machine learning and an intuitive news feed to Teramind's granular data collection capabilities, what you get is next-level insight in record time.

Understand your workforce.

Teramind OMNI gives you clear, consumable, actionable insights aligned to what you most want to track. Want to alert on signs of burnout? Identify teams that may be over or under-working? What about ensuring "active" time isn't the result of activity falsification, like mouse jigglers or weighing down a key on the user's keyboard?

Unlock actionable insights.

Case-based event organization:
- ✔ Events appear on cards including the user's screen, rule violated, and all data you need to quickly understand what happened.
- ✔ Click any card to see more information.
- ✔ Build cases to document instances of a rule violation over time.

Feed-style content presentation:
- ✔ Cards scroll in a machine learning trainable feed.
- ✔ Alerts are prioritized by what's most important to you.
- ✔ OMNI groups like insights together, so you can quickly see trends and persistence.

Visualizations enable rapid consumption:
- ✔ Speed up the time it takes to understand what's happening.
- ✔ OMNI makes your data easy to consume.

Find out who's struggling right away.

With *41% of full-time employees working remotely all or part of the time, understanding warning signs quickly is essential.
