

Teramind OMNI

More insights, less time.

Who doesn't love a good dashboard? When you add machine learning and an intuitive news feed to Teramind's granular data collection capabilities, what you get is next-level insight in record time.

Enhance internal security.

Teramind OMNI gives you clear, consumable, actionable insights into more than 40 critical metrics, including essential cybersecurity and insider threat prevention data, aligned to concepts from the MITRE ATT&CK® knowledge base.

Unlock actionable insights.

Case-based event organization:

- ✓ Events appear on cards including the user's screen, rule violated, and all data you need to quickly understand what happened.
- ✓ Click any card to see more information.
- ✓ Build cases to document instances of a rule violation over time.

Feed-style content presentation:

- ✓ Cards scroll in a machine learning trainable news feed.
- ✓ Alerts are prioritized by what's most important to you.
- ✓ OMNI groups like insights together, so you can quickly see trends and persistence.

Visualizations enable rapid consumption:

- ✓ Speed up the time it takes to understand what's happening.
- ✓ OMNI makes your data easy to consume.

Alleviate alert fatigue.

***70%** of IT security professionals say the volume of their security alerts has doubled in the past five years, **with over 1,000 alerts / day.**
