

Employee Monitoring, Productivity, and Business Process Optimization

Powered by **User Behavior Analytics**

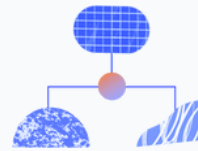

Platform Highlights

Analyze High Performers

Understand the habits that make your highest performers successful, so you can support those habits across the organization.

Business Process Optimization

Analyze cohort behavior in specific business processes to identify ways to optimize workflows.

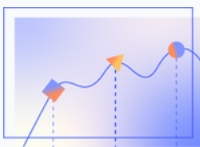

Custom KPIs

Choose which user actions become a performance metric and apply to whole groups, so you can customize productivity measurements for different types of employee roles.

Compare Work Location Productivity

Use geolocation feature to compare productivity rates for in-office versus remote work days or whole teams.

Streamline Workflows

Integrate with project management tools to find and fix process gaps, bottlenecks, or redundancies and improve efficiency.

Remediate Skills Gaps

Use behavior analytics and application use metrics to identify skills gaps that can be supported with training to improve employee efficiency.

Since 2014, over 10,000 organizations around the world have trusted Teramind to provide insider threat detection, data loss prevention, and business process optimization through behavioral user data.

By harnessing behavior analytics, our award-winning platform has helped enterprises in finance, retail, manufacturing, energy, technology, healthcare, and government optimize their workforce and protect their businesses.
